Dear Colleagues:

We present a special issue of the journal dedicated to the parallel algorithms in interval computations. This issue is a continuation to the special issue of *Interval Computations* No 3, 1994 on the same subject. Two more papers from those submitted for the special issues were published in the first issue of the journal *Reliable Computing*.

We would like to thank the invited editors of the special issues A. Bernat and V. Kreinovich for their great work of preparing the issues. We also hope that the tradition of special issues on parallel algorithms will be continued. The authors are invited to submit papers on corresponding subjects.

V. M. Nesterov,
Editor-in-chief
