Interval Session at ICMIS 2013, Luxor, Egypt

Dear interval researcher,

we would be very pleased if you would contribute to our Session on Interval Mathematics which we are organizing at the

Third International Conference on Mathematics and Information Sciences (ICMIS 2013), Dec. 28-30, 2013, Luxor, Egypt.

Please consult the conference webpage

<http://conf.naturalspublishing.com>

for additional information. The organizers of the conference allow 15 minutes for a contributed talk (+ 5 min for discussion). If you intend to give a talk at the special session please submit your abstract through the conference webpage (important: start the title of your talk with 'SIM' for Session on Interval Mathematics) and send it in parallel as soon as possible, however, not later than Nov 1, 2013 to

hassanowny02@yahoo.com
garloff@htwg-konstanz.de

We are sorry that we cannot provide any financial support but there is some support available for young researchers (see the conference webpage). Luxor is well-known for its ancient temples.

With best regards,
Hassan B. M. El-Owny
Juergen Garloff
